

BOARD OF SUPERVISORS' AGENDA

Meeting Date: 9-19-2023

Item Number:

Subject: King George County Defense Production Zone Ordinance

Summary of Information:

King George County is aggressively trying to attract defense production businesses that will support and complement Naval Support Facility Dahlgren and its tenants. King George has been a defense community for over a century, and with the county's largest employer being the Department of Defense, King George has a unique opportunity to grow this industry sector with its existing workforce and infrastructure.

At the July 11th Board of Supervisors meeting, the recommendations of additional provisions were requested to add further detail of potential conditions in which the Board of Supervisors can remove a defense production zone designation if a qualified business were to fall out of compliance with the County's zoning ordinance as well as additional circumstances that the County could recall incentives provided to a business during the incentive period. Those revisions were added to the ordinance with clear guidelines with support from the County Attorney's office. Additionally, at the request of the Board, the Department held a town hall on September 14th to answer questions and address public concerns.

Recommended Action:

Staff recommends that the Board of Supervisors move to advertise the Defense Production Zone ordinance for adoption.
