

## January 2026 REPORT FOR THE DEPARTMENT OF SOLID WASTE & RECYCLING

### On-Site Inspections

- Total Loads: 2,852
- County staff conducted 114 random load inspections. All material complied with the facility permit and state regulations.
- Waste Management personnel conducted 247 random load inspections. All material complied with the facility permit and state regulations.
- The last compliance inspection from VA DEQ occurred on December 3, 2025, with no issues or violations.

### Off-site Odor Inspections

County staff conducted 30 offsite odor inspections this month, and offsite odor was detected two times.

- At 4:40 PM on 1/8/26, mild landfill gas odor was detected between 9242 and 10030 Fletcher's Chapel Road.
- At 8:30 AM on 1/21/26, mild landfill gas odor was detected in the vicinity of 9223 Bloomsbury Road.

### Major Projects

- The landfill gas project is now scheduled to be completed in February 2026. When complete, 15 new collectors will be installed and connected to the vacuum system. The expansion also includes 2,300 linear feet of 18" header pipe and approximately 10,000 linear feet of lateral pipe.
- Cell 18 construction is complete. The CTO inspection is scheduled for February.

---
